

# Spark Chat with webRTC videoconf features enabled

---

## HOWTO Use Spark with webRTC features @Free-Solutions.org

If you have not yet created your profile on [free-solutions.org](https://free-solutions.org) , create your account as described here

Use Spark Client to connect to [free-solutions.org](https://free-solutions.org) on Mac or MS-WIN PC

Make sure **you have changed your password** and well noted the pass set.

## Spark credentials :

The screenshot shows the Spark Instant Messenger login window. The window has a blue title bar with the Spark logo and the text 'Spark'. Below the title bar is a world map with several red location pins. The main content area has the Spark logo and the text 'Instant Messenger'. Below this are three input fields: 'Nom d'utilisateur' (Username) with the value 'claudes\_stabile', 'Mot de Passe' (Password) with masked characters, and 'Serveur' (Server) with the value 'webrtc.free-solutions.org'. There are two checkboxes: 'Enregistrer le Mot de Passe' (Save Password) which is checked, and 'Login Automatique' (Automatic Login) which is unchecked. At the bottom are three buttons: 'Comptes' (Accounts), 'Avancé' (Advanced), and 'Login'.

Username will be your firstname\_lastname

Password : Is the pass you set within [free-solutions.org](https://free-solutions.org) : WordPress password

servername is : webrtc.free-solutions.org

## Software Download :

Download Spark Client from [ignite-realtime](#) and install package

Download attachment **webrtc-plugin.jar** and **drop the file in the plugin directory of your Spark installation**. Restart Spark

## Contact and Friends :

-You need then to add friends on [free-solutions.org](#)

Friends from [free-solutions.org](#) web site will show up as contacts
