voir ceci : <https://askubuntu.com/questions/1204571/chromium-without-snap>

For example, if your Ubuntu release is `eoan` (19.10):

1. Remove Ubuntu chromium packages:

```
sudo apt remove chromium-browser chromium-browser-l10n chromium-codecs-ffmpeg-extra
```

2. Add Debian buster repository. Create a file `/etc/apt/sources.list.d/debian.list` with the following content:

```
deb http://ftp.debian.org/debian buster main
deb http://ftp.debian.org/debian buster-updates main
deb http://ftp.debian.org/debian-security buster/updates main
```

3. Add the Debian signing keys:

```
sudo apt-key adv --keyserver keyserver.ubuntu.com --recv-keys DCC9EFBF77E11517
sudo apt-key adv --keyserver keyserver.ubuntu.com --recv-keys 648ACFD622F3D138
sudo apt-key adv --keyserver keyserver.ubuntu.com --recv-keys AA8E81B4331F7F50
sudo apt-key adv --keyserver keyserver.ubuntu.com --recv-keys 112695A0E562B32A
```

4. Configure apt pinning. Create a file `/etc/apt/preferences.d/chromium.pref` with the following content:

```
# Note: 2 blank lines are required between entries
Package: *
Pin: release a=eoan
Pin-Priority: 500

Package: *
Pin: origin "ftp.debian.org"
Pin-Priority: 300

# Pattern includes 'chromium', 'chromium-browser' and similarly
# named dependencies:
Package: chromium*
Pin: origin "ftp.debian.org"
```

chromium issue fix

Pin-Priority: 700

5. Install Chromium again

```
sudo apt update
sudo apt install chromium
```

This should install the latest chromium from the `debian-security` repository and look like this:

```
$ sudo apt install chromium
Reading package lists... Done
Building dependency tree
Reading state information... Done
The following additional packages will be installed:
 chromium-common chromium-sandbox libjpeg62-turbo libminizip1 libre2-5
Suggested packages:
 chromium-l10n chromium-shell chromium-driver
The following NEW packages will be installed:
 chromium chromium-common chromium-sandbox libjpeg62-turbo libminizip1 libre2-5
0 upgraded, 6 newly installed, 0 to remove and 9 not upgraded.
Need to get 56,6 MB of archives.
After this operation, 202 MB of additional disk space will be used.
